PROJECT EXPERIENCE

Systems Design Project – The Hope Buss - University of Louisville, CIS Course

August 2025 – December 2025

- Analyzed stakeholder and business requirements to design a nonprofit impact-tracking system supporting staff, administrators, and public users
- Developed use cases, system requirements, and traceability matrices to ensure alignment between business goals and system functionality
- Designed data models and dashboards to enable accurate reporting, transparency, and data-driven decision making

SQL Data Analytics for Property Management - University of Louisville, CIS Course Project

August 2024 – December 2024

- Developed SQL queries to retrieve, analyze, and report data from the StayWell database for real-world business scenarios.
- Utilized SQL functions to filter, sort, and join tables, creating comprehensive data views for decision-making.
- Analyzed query results to uncover trends and insights that supported operational improvements

Cybersecurity Analyst - University of Louisville, CIS Course Project

January 2025 – May 2025

- Developed information security policies focused on access control, encryption, and risk mitigation to protect data. Conducted risk assessments using security frameworks such as NIST 800-53 and ISO 27001 to identify and address vulnerabilities.
- Researched and applied security controls including firewall configurations, VPNs, IDPS, and cryptographic protocols (AES, RSA, SHA).

WORK EXPERIENCE

Package Handler - UPS, Louisville, KY

March 2024 – present

- Support import logistics operations by processing, sorting, and preparing packages while maintaining accuracy, safety, and efficiency in a high-volume environment.
- Monitor package flow, identify delays or workflow issues, and communicate with team members to help keep operations moving smoothly.
- Gain hands-on experience with package tracking, operational procedures, and logistics workflows, building a stronger understanding of business processes and data-driven operations.

Web Development & Business Analyst Intern - O’Cuts Barber Shop, Louisville, KY

January 2026 – April 2026

January 2025 – May 2025

- Gathered business requirements from the owner through weekly meetings and translated feedback into website updates that improved usability, branding, and customer experience.
- Analyzed customer needs, service information, and competitor websites to recommend improvements to the site layout, content structure, and online booking flow.
- Built and updated a responsive website using HTML, CSS, and JavaScript while supporting business goals such as stronger online visibility, clearer service information, and easier customer access.

COMMUNITY SERVICE

AL-Zahrah Islamic Center,

Louisville, KY | 2017 – Present

- Actively participate in community events and outreach initiatives to support and assist residents.
- Support community outreach while managing the organization’s social media, website, and digital presence
- Provide technical support and assist in maintaining and improving organizational accounts and systems

Beta Alpha Psi, Member

University of Louisville | 2024 – 2025

- Leading and mentoring a team by assigning tasks, providing guidance, fostering skill development, and promoting collaboration through regular meetings, challenge resolution, and an inclusive team culture.
